## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanaoka et al, US Patent No. 5,521,590.

Hanaoka et al disclose a data carrier system for non-contact communication comprising: a data carrier 200 having a reception coil 1 for receiving an AC magnetic field emitted from fixed facilities 150 and providing an AC voltage; a rectifier circuit 4 for rectifying the AC voltage into a direct-current (DC) source voltage; a wave detector circuit 3 for demodulating communication data superimposed on the AC voltage, to extract input data; a data carrier main circuit 100 for receiving the input data; a modulator circuit 2 for generating reply data for the fixed facilities 150 according to data stored in the data carrier main circuit 100; and a transmission coil 1' for generating an AC magnetic field according to the reply data. The data carrier 200 has no battery. The data carrier main circuit 100 includes a memory circuit 9 formed of a MONOS EEPROM and a control circuit 10. The control circuit 10 has a data read

Art Unit: 2876

unit for reading data out of the memory circuit 9 and a data write unit for writing data to the memory circuit 9. (See col. 5, line 20+; figs. 1, 3-5).

*Allowable Subject Matter*

4. Claims 15-20 are allowed.
5. Claims 2-14 and 22-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: Although the prior art of record teaches a device that includes circuit for acquiring a current induced by electromagnetic induction wherein the is powered through an external power source, the power obtained is drained within a predetermined time, etc., the prior art of record fails to disclose or fairly suggests all the details including having an output unit, which includes a plurality of output elements, each element outputting the signal in response to an instruction, each element state change with lapse of time, or the specific structure of the antenna connection with respect to a sealing material. These limitations in conjunction with other limitations in the claims were not shown by, would not have been obvious over, nor would be fairly suggested by the prior art of record.

*Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 2876

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
